# Corinth Pipeworks achieves net zero carbon emissions

We are proud to announce that we are the 1<sup>st</sup> steel pipe manufacturer for the energy sector, globally, whose operations have net zero carbon emissions (ISO 14064 GHG scope 1 & 2).

The infographic features a background image of a landscape with a large tree and a body of water under a blue sky with clouds. At the top left, the Corinth Pipeworks logo is displayed with the text "Member of CENERGY HOLDINGS". Below this, four icons represent key sustainability goals: a lightbulb for "100% green electricity", a leaf and plug for "Energy efficiency", a CO2 molecule for "Reduce carbon footprint", and a scale for "Offset carbon footprint". The central text reads "Corinth Pipeworks achieves net zero carbon emissions". At the bottom, a paragraph states: "We are proud to announce that we are the **1<sup>st</sup> steel pipe manufacturer** for the energy sector, globally, whose operations have net zero carbon emissions (ISO 14064 GHG scope 1 & 2)."
