## Corinth Pipeworks is awarded contract for the Alexandroupolis Floating Storage and Regasification Unit (FSRU) pipeline

Corinth Pipeworks has been awarded a contract by Saipem S.p.A for the development of an offshore and onshore natural gas pipeline by Gastrade. The Floating Storage and Regasification Unit (FSRU) will be connected to the National Natural Gas Transmission System of Greece, through a 28 km long pipeline, through which the gasified LNG will be transmitted to Northeastern Europe, with the prospect of also supplying Ukraine.

Corinth Pipeworks' proposal was evaluated as the most advantageous, providing a both technically and economically feasible solution. The offer consists of 28 km of 30" SAWL steel pipes, which also includes anti-corrosion coating and concrete weight coating. The entire quantity of pipes will be manufactured and externally coated at the Company's plant in Thisvi, Viotia, Greece. Deliveries are scheduled to begin in 2023.

The development of the pipeline plays a decisive role in the energy security of Greece, the Northeastern Europe and contributes decisively to the smooth energy transition and heterogeneity of supply to this extremely sensitive region.

The pipeline's construction and operation will strengthen the strategic role of Greece, as an energy hub for the wider region of Northeastern Europe and will offer alternative sources and routes of natural gas supply, strengthening security of supply and energy autonomy, in a challenging period.

### About Saipem S.p.A

*Is a global player in the energy industry and infrastructure. The Company is an advanced technological and engineering platform for the design, construction and operation of complex, safe and sustainable infrastructures and plants, offering tailor-made solutions and enabling energy transition.*
