

PRESS RELEASE

Athens, 6th of September 2022**Hydrogen certified pipes for the Polish Gas Network
delivered by Corinth Pipeworks**

80km of 40" diameter coated steel pipes awarded to Corinth Pipeworks by the gas transmission operator of Poland GAZ-System SA are being used for part of the Gustorzyn - Wronow gas pipeline.

This section of the pipeline will be the first high-pressure, newly constructed transmission gas pipeline in Poland, also among the first in Europe, which will be certified for future transportation of up to 100% hydrogen

Under the technical framework of the ASME B31.12 option B design code, Corinth Pipeworks & Gaz System cooperation provides a safe and economically feasible solution for the transportation of both natural gas and hydrogen at high pressures through new large diameter, high strength steel pipelines. This means that pipes produced today and installed for the current natural gas network will also be suitable for transporting increasing volumes of hydrogen as the energy transition gathers pace in the years ahead.

About GAZ-SYSTEM S.A.

Gas Transmission Operator GAZ-SYSTEM S.A. is a strategic company for Poland's economy and energy security. GAZ-SYSTEM's key task is the transport of gas via the transmission network throughout the country to supply with gas the distribution networks and final customers connected to the transmission system.
