

AkerBP's Utsira High offshore project, is awarded to Corinth Pipeworks

Corinth Pipeworks was awarded a contract from TechnipFMC for 27 km of High Frequency Welded (HFW), steel pipes for the Utsira High Project development project in the North Sea.

The Utsira High Project is a bundle of two separate subsea tie-in projects, Symra and Solveig, in the central part of the North Sea. Symra will be a tie-in to the Ivar Aasen platform, while Solveig phase 2 will be connected to the Edvard Grieg platform. The Utsira High project adds valuable production, while all producing fields on the Utsira High will be operated with electrical power from shore. Thus, the CO2 emissions from the production phase will be very low.

The pipes will be manufactured at Corinth Pipeworks' facilities in Greece, while the scope of supply also includes an external 3-layer polypropylene coating applied at the same location as pipe manufacturing at Thisvi, Greece.

About AKER BP

Aker BP explores for and produces oil and gas on the Norwegian continental shelf. In production AkerBP is one of the largest independent listed oil companies in Europe. The company is listed on the Oslo Stock Exchange with the ticker 'AKRBP'. For more information, please visit www.akerbp.com

About TechnipFMC

TechnipFMC is a leading technology provider to the traditional and new energy industries, delivering fully integrated projects, products, and services. With proprietary technologies and comprehensive solutions, the company is transforming its clients' project economics, helping them unlock new possibilities to develop energy resources while reducing carbon intensity and supporting their energy transition ambitions. Organized in two business segments — Subsea and Surface Technologies — they continue to advance the industry with pioneering integrated ecosystems (such as iEPCI™, iFEED™ and iComplete™), technology leadership and digital innovation. Each of its approximately 21,000 employees is driven by a commitment to clients' success, and a culture of strong execution, purposeful innovation, and challenging industry conventions. About Corinth Pipeworks

Corinth Pipeworks (CPW), steel pipe segment of Cenergy Holdings, is a leading steel pipe manufacturer for the global energy and construction sector. With projects executed in more than 50 countries worldwide, we develop valuable solutions, exceed our customers' expectations whether the application is a challenging offshore subsea flow line, a high criticality onshore gas transmission pipeline,

transportation of 100% hydrogen at high pressures through large diameter/high strength steel pipelines, or a specialized structural steel requirement. All this by combining experience, on time delivery, innovation and investments in the latest technology. For more information about our company, please visit our website at www.cpw.gr
