

PRESS RELEASE

Athens, September 8th, 2026

Corinth Pipeworks to Supply DESFA's «Duplication of Karper-Komotini HP Branch» project, strengthening Greece's energy infrastructure and hydrogen readiness

Corinth Pipeworks has been awarded a major contract by DESFA (Hellenic Gas Transmission System Operator) for the manufacture and supply of steel pipes for the “Duplication of Karperi–Komotini High-Pressure Branch” Project, a significant energy infrastructure investment currently underway in Greece.

Under the scope of the project, Corinth Pipeworks will manufacture and supply more than 200 km of 30-inch Helical Submerged Arc Welded (HSAW) linepipe, which will contribute to the development of a new parallel high-pressure transmission network designed to enhance the capacity, flexibility and resilience of Greece's National Natural Gas Transmission System.

The pipes will be manufactured at Corinth Pipeworks' state-of-the-art facilities in Thisvi, Greece, and will be supplied with external 3-layer polyethylene (3LPE) anti-corrosion coating and internal epoxy lining.

A key feature of the project is the hydrogen-ready design, enabling the pipeline system to support the transportation of up to 100% pure hydrogen, supporting Greece's and Europe's transition towards cleaner energy solutions.

The “Duplication of Karperi–Komotini High-Pressure Branch” represents a strategic infrastructure project for Greece. The new 218,5 km parallel network will help eliminate capacity constraints in the northern section of the National Natural Gas Transmission System, strengthen energy security, enable increased regional interconnections, including exports towards the Interconnector Greece–Bulgaria (IGB), and support the growing energy needs of the region.

With extensive experience in major transmission and energy infrastructure projects worldwide, Corinth Pipeworks provides advanced steel pipe solutions that support the evolving needs of the energy sector, from natural gas infrastructure to hydrogen and other low-carbon applications

About DESFA

The Hellenic Gas Transmission System Operator (DESFA) S.A. is responsible for the operation, management, use and development of the Hellenic Natural Gas System. Possessing extensive experience and having highly skilled personnel, DESFA is a reliable partner in the framework of the ongoing international energy projects in Southeastern Europe, and beyond. DESFA is the enabler of a sustainable energy future, accelerating Greece's energy transition towards a decarbonized economy. For additional information, please visit www.desfa.gr

About Corinth Pipeworks

Corinth Pipeworks (CPW), steel pipe segment of Cenergy Holdings, is a leading steel pipe manufacturer for the global energy and construction sector. With projects executed in more than 55 countries worldwide, we develop valuable solutions, whether the application is a challenging offshore subsea flow line, a high criticality onshore gas transmission pipeline, transportation of 100% hydrogen at high pressures through large diameter/high strength steel pipelines, or a specialized structural steel requirement. All this by combining experience, on time delivery, innovation and investments in the latest technology. For more information about our company, please visit our website at www.cpw.gr
